

Supergloves 878 Blue Grip latex onderzoekshandschoenen 100st.

The Supergloves 878 Blue Grip latex research glove is made of a pure, light powdered high quality latex. The honeycomb anti-skid pattern on the fingertips and the palm of the glove provide an excellent grip. Thanks to the non-skid pattern the glove can be used for a longer period of time, that ensures that a packaging of Supergloves wears well longer. Despite that the glove is very strong, it is extremely flexible. The non sterile glove can be worn by both right-and left-handers.
