

PolySafe Sump Pallet

PSW 6.2

Description

The polysafe ECO system is manufactured from environmentally friendly polyethylene (PE) and is ideal for the storage of acids, alkalis, oils and non-flammable cleaning chemicals. It has a sturdy pallet style storage surface with openings to allow spilt liquids to run into the sump. The pallet can be removed to enable the sumps to be stacked to save storage space.

2 x 60 litre containers or containers holding 20/30 litres.

Key benefits

- Also suitable for horizontal storage or as dispensing station when used with PE drum mount
- Made of polyethylene (PE)
- Highly resistant to oils, acids, alkalis and other aggressive substances
- Totally corrosion-free
- Easy to clean

Technical features

The storage of flammable liquids included in the European VbF hazardous materials classifications A1, A11 and B (also R10, R11 and R12 classifications included in regulations governing hazardous materials) is prohibited.

If you are storing liquids included in the groups below, evidence of the density and media resistance of the sump materials is not required:

- Watery solutions from organic acids up to 10%, mineral acids up to 20% such as acidic hydrolysing salts in watery solutions (pH<6), apart from hydrofluoric acid, oxidising acids and their salts.
- Inorganic alkalis such as alkaline hydrolysing salts in watery solutions (pH>8) apart from ammonia solutions and oxidising solutions from salts (for example hypochlorite).
- Inorganic solutions, non-oxidising salts with pH values between 6 and 8.

Specifications

Item No.	1213891
Storage capacity	Small containers up to 60 l
Version	Spillage decking
Deposit area	Grid plastic
Material	Polyethylene
Colour	Blue
Sump capacity	60 l
Height	210 mm
Width	795 mm
Depth	645 mm
Total load capacity	240 kg
Equipment	With grid, Polyethylene (PE)
